

FOR IMMEDIATE RELEASE

CoaxHD70: High Density and High Frequency Multi-Line Solution for Test & Measurement

November 2024 — Radiall, a global leader in the design, development and manufacturing of innovative interconnect solutions, has developed CoaxHD70, a new multi-line solution.

The CoaxHD70 family offers a high-density multi-line solution capable of supporting signal transmission up to 70 GHz to further enhance Radiall's portfolio for the Test & Measurement market.

Available in 8 and 16 port configurations, CoaxHD70 optimizes space and installation efficiency. The press contact design is engineered for 1,000 mating cycles. Jackscrews ensure a secure plug-to-receptacle connection, while the comb-shaped clip holds eight contacts in place within the housing to ensure a robust and reliable locking mechanism. Mating and unmating are effortless and does not require any special tools.

Additionally, the CoaxHD70 family supports field repairs, delivering both maintenance flexibility and cost savings.

For more information on Radiall's CoaxHD70, please contact a Radiall sales representative or visit www.radiall.com.
