

RADIALL QUALITY-SAFETY-ENVIRONMENT POLICY

In order to improve effectiveness of our Management System, to meet requirements and foster Continuous Improvement on a permanent basis, Radiall has defined a set of objectives guiding our policies for Quality, Safety and Environmental Management :

- To structure the RADIALL's whole organization to support our strategy and be focused on customer satisfaction
- To be innovative at all levels of the value chain as a result of a dynamic organization in addition to an industrial model oriented toward the continuous improvement of the processes and risk management.
- To suppress malfunctioning of any nature in order to contribute to the Company's prosperity.
- To promote personal development through skills enhancement, motivation and the respect of RADIALL values.
- To maintain compliance with current laws and regulations (social, environmental, safety, ...).
- To promote the environment respect :
 - By integrating the environment in the conception of products and processes.
 - By controlling industrial waste and improving the plants management of wastes.
 - By reducing the facilities consumption of energy, paper and water.
 - By promoting the respect of the environment at our suppliers and subcontractors.
- To promote the safety :
 - By risk preventive actions through individual training with respect to his/her work.
 - By integrating the safety into the conception of products and processes.
 - By developing practices which insure the safety of the data and materials.
