Subject: *Environmental Compliance*

Dear Customer,

As a manufacturer of interconnect components and solutions serving the telecommunication, aerospace, defense, instrumentation, industrial and medical markets, Radiall certifies that, to the best of its knowledge and relying on the answers from its own supply chain:

- Radiall complies with the requirements of the European Regulation (EC) No 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals ("REACH"). SVHC statements per Radiall product part number are available. Such statements specify substances listed in the candidate list of SVHC of the REACH Regulation (which list includes substances of Annex XIV), when the substance concentration is higher than 0.1% per weight (w/w). In particular, Radiall's products do not intentionally contain asbestos.
- Radiall complies with the European Regulation (EC) No 1005/2009 and the American Clean Air Act implementing the Montreal Protocol against the Ozone Depleting Substances.
- Radiall is deploying its best efforts to follow Section 1502 of the US Dodd-Frank Act regarding Conflict Minerals and regularly updates its CSFI-CMRT reporting template.
- Radiall complies with the Council Directive, 2013/59/EURATOM, laying down basic safety standards against the effects of ionising radiation and/or other similar principles.

Radiall does not produce and does not sell electrical and electronic equipment (EEE), but only components. Therefore, Radiall's products are not directly subject to the requirements of the European Directive 2011/65/EU concerning the restriction of hazardous substances (RoHS2). However, Radiall has implemented such Directive for a large range of its products.

Information on RoHS status of Radiall's products may be found on Radiall's website at the following address: www.radiall.com or may be notified upon request under the form of a compliance certificate.

Radiall continues its efforts to improve its environmental policy.

Should you have further additional questions, please feel free to contact Sylvie Lefloch Dubois at sylvie.lefloch-dubois@radiall.com or infoenv@radiall.com.

Sincerely,

Sylvie LEFLOCH DUBOIS
